

Tipps zum Lesen der Eagle-Hilfe:

1. Zum Lesen Adobe Reader 6.0 verwenden, da dieser eine sehr gute Suchfunktion besitzt.
2. Um nur nach den Kapitelüberschriften suchen zu können, das PlugIn Bmfind32.api (60kb API for Windows 9x/NT) in den Ordner .\Adobe\Acrobat 6.0\Reader\plug\_ins kopieren. Das Plugin kann kostenlos von der nächsten Seite aus kostenlos heruntergeladen werden.

## Bookmark Find (Windows Reader and Exchange Version)

Bookmark find is a plug-in that works with Reader or Exchange and installs a new button on the button-bar next to the Word Find button.

By pressing the Bookmark find button a dialog box appears asking the user which word they want to locate in the bookmarks. As each letter is typed the window will display a full-length Bookmark display corresponding to the letters typed.

Once the correct Bookmark is reached, a click on the description will take the user to that reference point. This means that with this plug-in, bookmarks can be accessed, but not displayed!

To install the plug-in, copy the .api file into the appropriate directory and they will become available the next time you start the program:

Acrobat Exchange: Acrobat3\exchange\plug\_ins\  
Acrobat Reader: Acrobat3\reader\plug\_ins\

This program's license specifies that it is for Personal Use only. If the plug-ins are to be used in a commercial environment or distributed on a network, CD-ROM, Internet/Intranet/Extranet, a license fee is payable. Please contact [sales@computerstream.co.uk](mailto:sales@computerstream.co.uk) for details.
